[as it] builds on the world established in the previous hour, as we continually encounter new facets of Hannah's life and new characters. We don't have to launch an investigation. A large and growing body of Canadian and international research has found clear links between increases in suicide rates and harmful media portrayals of suicide." Ways in which the portrayals of suicide may cause harm, according to CMHA and CASP, include the following: "They may simplify suicide, such as, by suggesting that bullying alone is the cause; they may make suicide seem romantic, such as, by putting it in the context of a Hollywood plot line; they may portray suicide as a logical or viable option; they may display graphic representations of suicide which may be harmful to viewers, especially young ones; and/or they may advance the false notion that suicides are a way to teach others a lesson."[140][141] A 2019 study in the Journal of the American Academy of Child and Adolescent Psychiatry found that the overall suicide rate among 10- to 17-year-olds increased by 28.9 percent in April 2017, the month immediately following the release of the first season. 13 Reasons Why Netflix series: Considerations for educators (handout). In the fourth and final season, Clay's mental health deteriorates as a result of the deaths of Bryce and Monty, while the other students of Liberty High plan for their impending graduation and future. ^ National Association of School Psychologists. October 7, 2016. The actress' performance is full of dynamic range, setting it against Minnette's often more complicated task in differentiating between moods that mostly go from uncomfortable to gloomy to red-eyed, hygiene-starved despair."[57] Ryan of Variety also gave praise to not only the two leads but also the supporting cast of actors, particularly Kate Walsh's performance as Hannah's mother, which Ryan describes as "career-best work".[55] Positive mentions from various critics, such as Ryan, Feinberg and Schedeen, were also given to the supporting cast of actors (most particularly Alisha Boe, Miles Heizer and Christian Navarro's respective performances as Jessica, Alex and Tony). Alev Scott, a writer from The Financial Times, argues that adding a precaution at the beginning of the piece could create a negative mindset that readers will carry with them into the reading, even if they might not initially have had this mindset.[15] Nevertheless, especially after the release of the Netflix show, critics are revisiting the novel to question whether it glorifies suicide.[14] Ali Jan Maqsood, a writer at the DELTA school, suggests that this is a book all young adults should read to inform them about how life events can create negative thoughts, which can then lead to cynical views about one's life.[2] Thirteen Reasons Why has frequently been challenged and removed from schools and libraries, according to the American Library Association. This community also expressed major concerns about the series romanticizing suicide, not providing adequate resources at the conclusion of each episode, targeting a young vulnerable audience, and painting mental health professionals as unhelpful and not worth seeing.[104][105][106] Mental health experts are also educating the general public on what to do in the situations Hannah Baker goes through, disseminating accurate information surrounding teen suicide, depression, and youth that experience traumatic events through research surrounding the show and mental health resources for help-seeking youth.[114] The release of 13 Reasons Why corresponded with between 900,000 and 1.5 million more suicide-related Google searches in the United States, including a 26 percent increase in searches for "how to commit suicide", an 18 percent increase for "commit suicide", and a 9 percent increase for "how to kill yourself".[115] After an initial spike in calls to the Crisis Text Line after the first episode, there was an overall reduction in crisis call volume for the remainder of the series.[116] Although the link between searching for suicide information and suicide risk is unclear,[117] increases in self-harm admissions to one children's hospital were observed.[118][119][120][121][122] The Australian youth mental health service for 12–25 year-olds, Headspace, issued a warning in late April 2017 over the graphic content featured in the series, due to the increased number of calls to the service following the series' release in the country. Some researchers and medical professionals argue that the series violated guidelines for depicting suicide in the media and might trigger "imitative" behaviors among high school students and vulnerable people.[96] Prior to the series' release, scholars had studied the influence of the media on suicide for decades.[97] Evidence to support the existence of a relationship between fictional media exposure and suicide behaviors remained weak and a strict causality had never been established.[98] The effect that fiction can have on suicidal thoughts and behaviors is probably smaller than that of other psychological and social risk factors for suicide.[99][100] It has been argued that censoring fiction may do more harm than good.[99][101] After the series' release, a study published in the Journal of the American Academy of Child and Adolescent Psychiatry found that suicide among teenagers rose by 28.9 percent in the month after Netflix launched the show.[102][103] Several health professionals, educators and advocates linked the show to self-harm and suicide threats among young people. ^ "13 Reasons Why Renewed for a Second Season at Netflix". Liz Shannon Miller of Indiewire, who enjoyed the series and gave it a positive score of B+, gave praise to the racial, gender, and complex diversity of its supporting cast of teens.[55][53][57][58] Another aspect frequently mentioned within reviews was the series's mature and emotional approach to its dark and adult subject matter.
